

Product Overview

Amino Acids and Derivatives - Creatine Pyruvate

Rather than simply being a blend of creatine monohydrate and mineral chelated pyruvate (calcium, potassium, or sodium) containing pyruvate bonded to creatine. Creatine Pyruvate is composed of a stabilized and improved pyruvate and a highly bioavailable creatine. Degussa is the sole source of this new compound, having patented its composition, manufacture and application.

CREAPURE® PUROVATE® (Creatine Pyruvate)

Degussa's Creatine Pyruvate (protected by composition, manufacturing and application patents), is an ideal combination of Creatine and Pyruvic Acid in a 60 to 40 ratio.
